A LIST OF

Books for Children,

RECOMMENDED FROM THE KINDERGARTEN STANDPOINT

BY

ELIZABETH HARRISON,
Principal of the Chicago Kindergarten College,
Art Institute, Chicago, Ill.

CHRISTMAS, 1889.
BOOKS FOR CHILDREN.

Is not the food which you give to your child’s mind of as much importance as that which you give to his body?

When your boy stops questioning you, he has not stopped questioning concerning life and its problems; he has turned to those silent companions which you have placed upon his book shelf or on the library table. Shall heroes and prophets be his counsellors, or shall “Peck’s Bad Boy” and the villain of the dime novel teach him how to look at life? It rests with you.

There is a great difference between books which are to be read to children, those which are to be read with children and those which are to be read by children.

The second kind, which are more profitable than the first, require the mother’s sympathetic and genuine interest in the subject matter in hand; and
frequent stops for little talks about what has been read are necessary.

The third class are books for older children who can read well enough to peruse them alone, but if the mother will take time to read them before giving them to the child she will strengthen the bonds of intellectual sympathy between herself and him.

**LIST No. 1.**

Child Life, - - - - by J. G. Whittier
Child’s History of England, - - - by Chas. Dickens
Spinning Wheel Stories, - - - by Louise M. Alcott

Boyhood is pre-eminently the period of perception. Hence all books on scientific subjects are helpful, if they are simple enough to aid the child in seeing nature and her marvels. The mother should be careful that the child does not rest in mere perception of the objects of nature, but that he compares and classifies them, and, above all, that he is led to trace a purpose in created things, in order that he may learn “to look through nature up to nature’s God.”

**List of Children’s Books on Scientific Subjects.**
The Story Mother Nature Told, - - by Jane Andrews
Child's Book of Nature (3 vols.) - by Worthington Hooper
Among the Stars, - - - - by Agnes Giberne
History of a Mouthful of Bread, - - by Jean Mace

Little Lucy's Wonderful Globe, by C. L. Mateaux
Four Feet, Two Feet, and No Feet, by McCook
Odd Folks at Home, by Mary Treat
Tenants of an Old Farm Yard, by McCook
Home Studies in Nature, by Mary Treat

Many other valuable books might be added to this list. However, a few good books are better than many less good ones. It is well to lead a child to the world’s great books as soon as possible. Enough have been given to show the kinds of books which are not hurtful to children. Each book on the above list has been personally inspected.

After all it is not so important what your child reads as what you read. If the father reads nothing but the newspapers and the mother nothing but novels, what then? Children are taught as much by the general tone of conversation of their parents as by the books they are given to read.
A LIST OF BOOKS HELPFUL TO MOTHERS AND TEACHERS IN THEIR STUDY OF CHILD NATURE.
